

LSEG

WORKSPACE ADD-INS

MICROSOFT OFFICE VERSION COMPARISON

Important! On 12 December 2023, the **Workspace 365** add-in is renamed **Workspace Lite**. This change is intended to provide clarification in that, due to technological and functional limitations, the add-in has fewer features than the full product.

Access to LSEG® data and tools is provided through two separately installed add-ins. These provide additional menu ribbons in certain Office apps of Microsoft® 365, where:

- **Workspace**

This add-in is the core product, which has a comprehensive set of capabilities and is the recommended add-in for most users.

- **Workspace Lite**

This add-in provides basic capabilities and is typically recommended for macOS and web browser-based environments due to its functional limitations.

Additional information

For more detailed information regarding:

- Microsoft Office version requirements and browser compatibility, refer to the [Workspace Add-Ins - System Requirements](#).
- Capabilities supported by each add-in, refer to this document.
- Prerequisites, installation, and deployment instructions for the required add-in, refer to:
 - the [Workspace Add-Ins - Workspace Installation Guide](#), or
 - the [Workspace Add-Ins – Workspace Lite Installation Guide](#).

Office version comparison

The tools and functions that are available through the **Workspace** and **Workspace Lite** add-ins depend on the version of Microsoft Office that you have deployed:

Version ¹	Workspace					Workspace Lite
	Microsoft 365 ²	Office 2021 ^{2 3}	Office LTSC 2021 ⁴	Office 2019	Office 2016	Microsoft 365
FUNCTIONS AND FEATURES

¹ LSEG tests and supports Microsoft 365 Enterprise plans only and offers limited support for Business and Home plans.

² Other requirements include the configuration of Trust Center settings and the installation of Shared Runtime. For further information, refer to the [Workspace System Requirements](#).

³ Office 2021 is the retail version of Office, installed by individual users. For further information, see [get started with Office 2021](#).

⁴ Office LTSC 2021 is the version of Office that is made available to organizations through a [volume licensing agreement](#). For further information, see [Overview of Office LTSC 2021](#).
