

# LSEG WORKSPACE TECHNICAL ROADMAP

This document lists significant changes to the technical environments of LSEG Workspace® and Refinitiv Eikon and the versions to which they are currently assigned. For example, when we intend to introduce or remove support for an operating system. While every effort will be made to achieve the goals set out in this roadmap, they are provisional by nature.

For information about current requirements, refer to the System Requirements documents of Workspace and Eikon.

## Workspace

		1.23	1.24	1.25	1.26
Desktop					
Microsoft Windows	Server				
Apple	macOS				
Endpoint Management	Microsoft Intune
